Django Technical Assessment – Student Management System

Live Demo: <https://assessment-2-i2nr.onrender.com/login/>

Source Code: <https://github.com/amirthavalliwebdeveloper2018-dev/assessment>

I am aspiring to build my career as a **Junior Full Stack Developer (Django)** while bringing **2.2 years of professional experience as a Front-End Developer**. I have hands-on experience with **HTML5, CSS3, JavaScript, jQuery, Bootstrap 5, WordPress, Elementor, and WPBakery Page Builder**, developing responsive, user-friendly, and high-performance websites. My expertise includes converting UI/UX designs into responsive web interfaces, optimizing website performance, and implementing SEO and accessibility best practices.

Recently, as part of a Full Stack Developer (Django) Technical Assessment, I developed a complete Student Management System using Django. The project includes **User Authentication, CRUD Operations, Database Integration, and Reporting** features. I am currently strengthening my Django expertise by building hands-on projects and continuously enhancing my Full Stack Development skills.

Core Technical Skills

Frontend: HTML5, CSS3, JavaScript, jQuery, Bootstrap 5

Backend: Python, Django

CMS: WordPress, Elementor, WPBakery Page Builder

Tools: Git, GitHub, cPanel, Canva, Photopea

Other: Responsive Web Design, SEO, Accessibility, Cross-Browser Testing, Website Deployment, Code Optimization

I also have experience collaborating with designers and development teams to convert UI/UX designs into pixel-perfect, responsive websites while following SEO best practices and modern web standards.

I had a brief career gap due to personal circumstances. During this period, I remained committed to my professional growth by building personal projects, strengthening my front-end expertise, and expanding my

knowledge of Django and Full Stack Development.

I am currently based in **Banaswadi, Bangalore, Karnataka**, and I am available to join immediately.

My portfolio showcases several live projects that demonstrate my experience in developing responsive, high-performance websites using modern web technologies.

I am confident that my technical skills, hands-on project experience, and passion for web development will enable me to contribute effectively to your team. I would welcome the opportunity to discuss how my experience and skills align with your organization's requirements.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Amirthavalli Jeyaraj
